SentinelOne

Cloud Security Posture Assessment

Powered by SentinelOne CNS

See What Attackers See. Secure What Matters Most.

Cloud environments evolve fast—and so do their risks. Many organisations struggle with:

- Misconfigurations and overly permissive IAM settings that go unnoticed
- Limited time, people, and confidence to maintain secure posture
- Tool fatigue and alert overload that obscure what truly matters
- Uncertainty about compliance with standards like CIS, NIST, and MITRE
- Rigid and manual security processes that can't keep up with DevOps speed

Cloud teams are often left reacting to incidents instead of proactively reducing risk.

The Solution

Cloud Bridge's Cloud Security Posture Assessment uses SentinelOne Cloud Native Security (CNS) to deliver a rapid, agentless review of your AWS environment. It uncovers misconfigurations, compliance gaps, and real-world risks in days—not weeks.

You'll get a practical, prioritised view of your security posture. And if you need help fixing what we find, our team is ready with follow-on services.

Key Capabilities:

- Agentless onboarding with secure, read-only access
- 2,000+ CSPM checks across services like EC2, IAM, Lambda, and S3
- Compliance scoring against CIS, NIST, MITRE
- Clear report with remediation advice and roadmap
- Follow-up session with our cloud security specialists

The Outcome

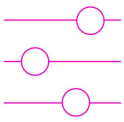
This is an actionable foundation for risk reduction. You'll walk away with:

- Clarity on your cloud risk posture
- Confidence to prioritise and act
- Support to fix what matters—either with your own team or ours

For many customers, this is the first step toward a more secure, resilient AWS environment—with a trusted partner by your side.

Delivered in 5 business days

Includes Executive-Ready Reporting



Minimal Set-Up Maximum Insight

Ready to Take Action?

This assessment is ideal for AWS customers looking for a fast, frictionless way to understand and reduce their cloud security risk. Whether you use the insights internally or engage Cloud Bridge for remediation, you'll take away real value.

Why Cloud Bridge?

- AWS Premier Tier Partner – Top-level recognition for proven customer success
- AWS MSP Competency – Only awarded to partners with deep operational capability
- Modular by Design – Pick only the services you need
- Outcome-Focused – We fix, improve, and advise — not just monitor
- Human + Automation – Efficient delivery backed by real experts
